Experience

Upwork
Freelance
February 2020 - Present (1 year 11 months)
Turkey

My activity is that I analyze and review the problems of web software and customers need to do back work or design the site and I accept the web software they need and if there is an agreement, I will deliver it. Most of the work I submitted was designed by Laravel Framework and PHP and the website template.

I worked as a backend and Laravel programmer in the web basin, and the other position I held was project manager, as well as configuring my company's servers and clients, and I designed, managed, and programmed a large number of websites and software.

shiraz1717
Website Manager
February 2007 - February 2020 (13 years 1 month)

I worked as a web developer and back-up developer, designing and programming an online store that was a startup in the food delivery basin.

behmansh novin
Frontend Developer
January 2014 - January 2015 (1 year 1 month)
Fars, Iran

My activity in this company was active as designing front applications for Android and Java programming, and I also did PHP work with it. This company

has a wide range of active mobile application design, and it was a good experience for me that the language of Android and Java I learned and implemented the template of a mobile application with XML based on my experience with HTML and CSS in this regard.

mehadresaneh

Shīrāz, Fars, Iran

My activity is that I analyze and review the problems of web software and customers need to do back work or design the site and I accept the web software they need and if there is an agreement, I will deliver it. Most of the work I delivered was designed by Laravel Framework and PHP and the website template. And the systems analysis that should be delivered in this collection.

boxoffice.ir
Back End Developer
September 2010 - December 2011 (1 year 4 months)
Shiraz County, Fars, Iran

I started my activity by creating a PHP language design company with the help of several friends, and several projects this year, which included a store, a blog, an ad site, an SMS panel, and a site suitable for advertising. I was the main writer who was programming the front and back codes and I was working on it and it is one of my programming experiences.

Education

Shiraz University
